The quality policy of SGCO is to achieve implementation of its awarded contractual Geophysics businesses with outstanding quality, consistent with customer, context of the organization, statutory and regulatory requirements as communicated and understood within the organization.

We aim to achieve this by:

- *Implementing and maintaining the Quality Management System as per the requirements of ISO 9001:2015*
- *Working towards continual improvement in all functional areas to maintain a leading position in the field of geophysical services contracting & consultancy.*
- *Defining and achieving the measurable quality objectives focused upon business improvement specifically reflecting on project- specific based quality plan.*
- *Ensuring maximum utilization of work force by motivation, training and career development.*
- *Developing and maintaining a mutually beneficial relationship with our suppliers and customers.*
